

DIAMOND
PETROLEUM VENTURES

Diamond Petroleum Ventures

Diamond Petroleum Ventures specializes in the design, engineering, manufacturing and maintenance of Class 1 Div 2 thermal pumping units, thermal tanks and pressure pumps.

Decades of experience in oil and gas engineering and design combined with continual research and development has advanced Diamond Petroleum Ventures as a front runner in the thermal product business.

As an ISNetwork member working in conjunction with Advanced Coiled Tubing and several elite chemical companies, Diamond Petroleum Ventures offers clients a complete thermal option that is safe, dependable and more efficient.

Equipment

The Diamond Petroleum Ventures thermal units are self-contained and are easily transported. The small footprint allows for use in confined spaces – specifically production and process facilities.

Diamond Thermal Heating Unit Applications:

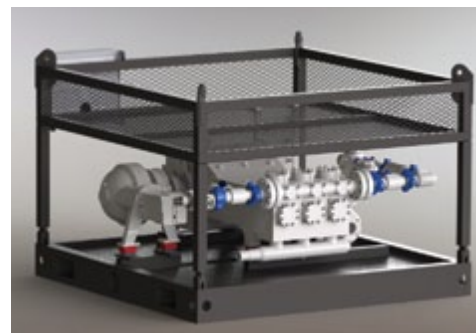

- Pipeline clean out
- Paraffin removal
- Asphaltine removal
- Melting hydrate plugs
- Vessel clean out
- Refinery and plant turnaround

Diamond Advantages:

- Class 1 Div 2 rated
- Non-fired system
- Fully-controlled temperature
- Compact size
- No exhaust-related heating
- Single operator

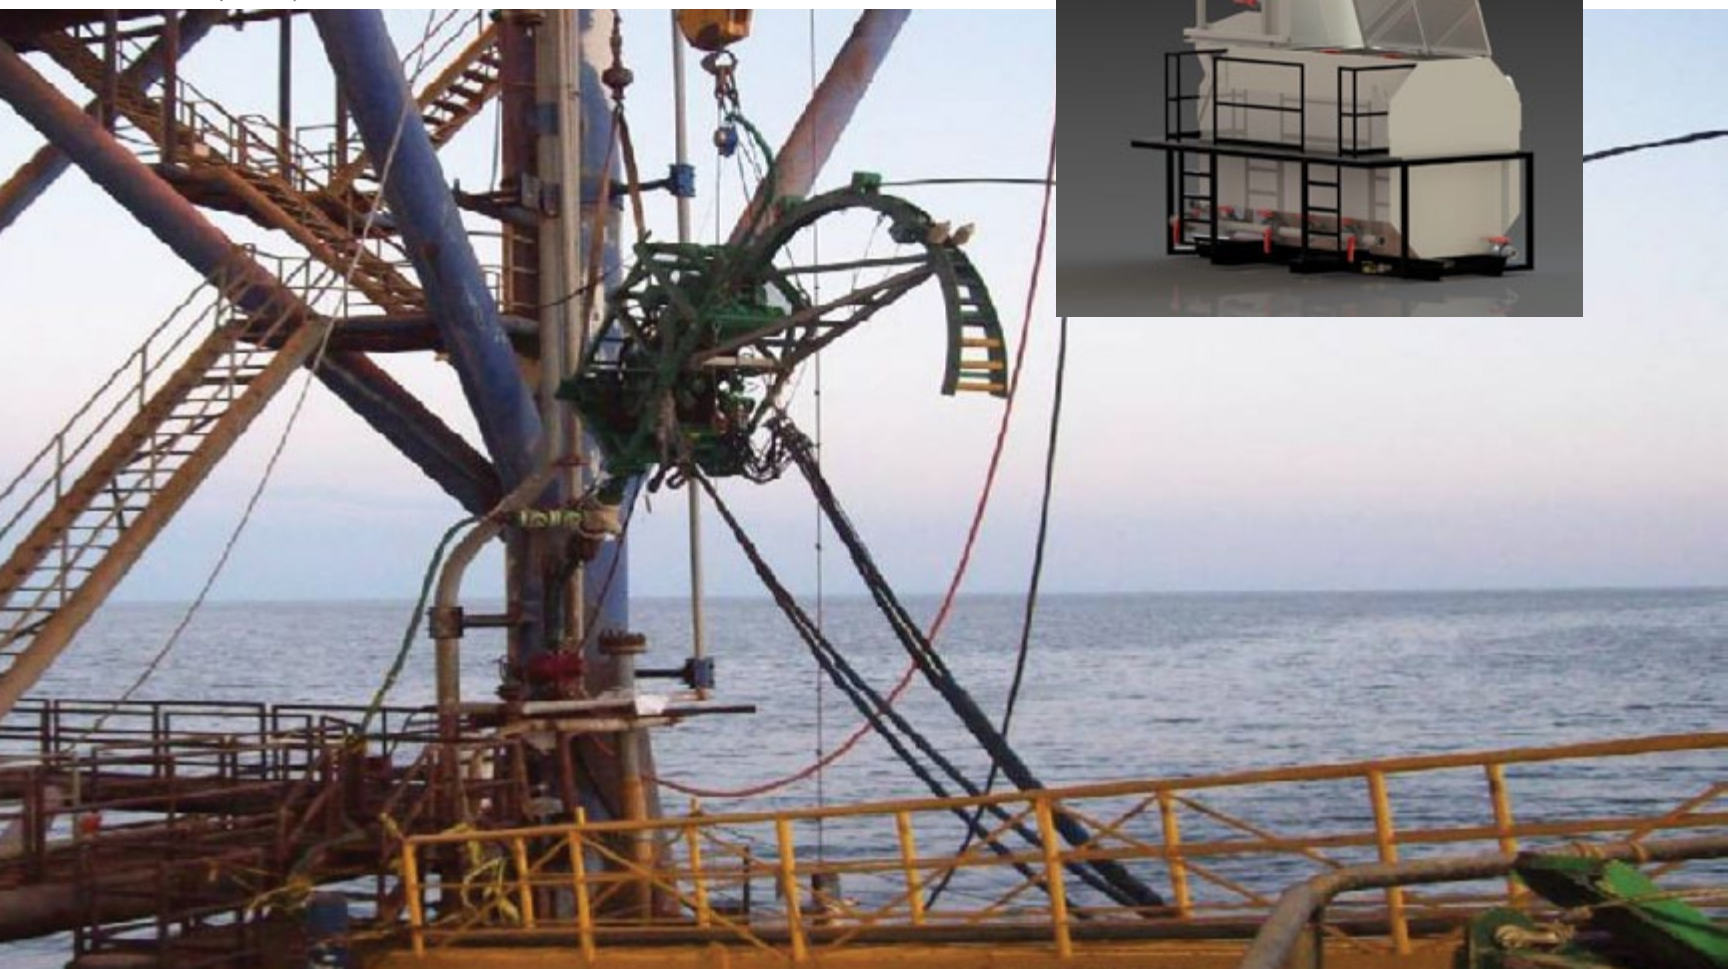

Thermal Unit

Fluid Pump

Platform Pipeline Entry

Integrated Thermal Tank,
Shale Shaker and
Gas Buster
